### **ESSENTIAL CHARACTERISTICS**

### **PERFORMANCE**

|                                          |            |
|------------------------------------------|------------|
| Slip Resistance                          | R9         |
| Water Absorption                         | E<0.5%     |
| Breakage Strength                        | MIN 1600 N |
| Modulus of Rupture (N/mm2)               | >35 N/ mm2 |
| Resistance to Thermal Shock              | Resistant  |
| Crazing Resistance                       | Resistant  |
| Resistance To High/Low Acids And Alkalis | A          |
| Resistance To Household Chemicals        | A          |
| Stain Resistance                         | 5          |
