A still life photograph featuring a terracotta pitcher, a yellow ceramic bottle, and a small potted succulent on a patterned floor. The floor is covered in a repeating geometric pattern of interlocking squares, each containing a stylized floral or star-like motif. The pitcher is made of reddish-brown terracotta and has a simple handle. The yellow bottle is cylindrical with a small spout and a cork stopper. The succulent is a small, green, fleshy-leaved plant in a light blue pot. The scene is lit from the upper left, casting soft shadows. A semi-transparent orange rectangle is overlaid on the right side of the image, containing the word "Patterned" in a bold, yellow, sans-serif font.

A modern interior space featuring a light gray wood-look tile floor. On the left, there is a white staircase with ornate balusters and a white wall. In the center, a large orange rectangular graphic contains the word "Wood" in a bold, yellow, sans-serif font. To the right, a dark wood coffee table with black legs holds a potted plant with green, feathery foliage. The background shows a white door and a white wall.

Additional Information

Ceramic

Lightweight and easy to clean. Unless stated otherwise, our ceramic tiles are suitable for use on **indoor walls only**.

Cleaning instruction:

Ceramic tiles can be cleaned with a non-abrasive, soap-free cleaning solution and rinsed or wiped clean with water.

Porcelain

Our porcelain **wall & floor** tiles are suitable for all indoor application provided substrate is suitable for the weight of the tile and adhesive.

They are suitable for use with both electric & hydronic underfloor heating.

For tiles less than 2cm stated suitable for use outside, your tiler must ensure these tiles are laid on a solid concrete base and that there are no air pockets present.

Cleaning instruction:

Unless stated otherwise, porcelain tiles can be cleaned using a non-abrasive mild cleaning fluid after being swept/brushed clean.

All tiles can be prone to “bowing” caused during the firing process. We can confirm that any tile supplied complies with European standards and tolerances.

Thorough checks are conducted prior to shipping and upon arrival in our UK warehouse.

Always ensure you are happy with the finish of your tiles before laying.

Slip resistance and breakage strength must always be taken into consideration when making tile choices for wet and commercial areas.

For polished tiles, there are now slip resistance treatments readily available on the market if required.

Ceramica Impex

Our decades of experience in the tile industry means we can identify and recommend the right products for your business, selected from our diverse portfolio and covering “good, better, best” price points.

New ranges can be sourced and produced depending on your specific needs.
